

ABHIJITH M D

Product Designer II | AI-Native & Enterprise SaaS | B2B / B2C

Bangalore, India | +91 7306201177 | abhijithmd02@gmail.com | <https://www.abhijithmd.xyz> | <https://linkedin.com/in/abhijithmd>

PROFESSIONAL SUMMARY

Product Designer with 4+ years of experience shipping enterprise SaaS, healthcare, and AI-powered products end to end, from 0-to-1 product discovery through launch. Founding designer who led user-centered design, interaction design, user research, and design systems for platforms serving high-volume clinical, CRM, and insurance workflows. Specialized in AI-native experiences: conversational UX, human-AI collaboration patterns, generative AI and LLM-powered features, and agent workflows. Partnering cross-functionally with product and engineering to deliver measurable outcomes, including ~80% recovery of blocked insurance revenue and 25-30% gains in task efficiency.

PROFESSIONAL EXPERIENCE

Product Designer II (Founding Designer)

Levich Solutions Pvt. Ltd., Bangalore, India | Aug 2023 - Present

- Led end-to-end, user-centered product design for Spectrum Healthcare's Patient Management and Accounts Receivable (AR) platform, simplifying clinical and billing workflows and enabling ~80% recovery of blocked insurance revenue.
- Designed Relay Hub, an AI-powered enterprise communication platform featuring conversational UX, AI agent workflows, and knowledge management for cross-functional teams.
- Crafted human-AI interaction patterns, including contextual recommendations, AI-assisted actions, and trust-building feedback loops, improving usability and adoption of generative AI features.
- Partnered cross-functionally with product managers and engineers to translate LLM capabilities into intuitive user experiences through rapid prototyping, design reviews, and iterative design sprints.
- Shipped a mobile-first CRM centralizing lead management, project tracking, scheduling, and field operations for roofing teams, increasing task efficiency by ~25-30%.
- Built an AI-assisted Proposal Builder with reusable templates and intelligent content generation, streamlining proposal creation for sales teams.
- Delivered an enterprise Insurance & Risk Management platform covering claim tracking, policy management, and internal operational workflows.
- Drove product discovery via stakeholder interviews, user research, usability testing, competitive analysis, and workflow mapping to define user-centered solutions.
- Established scalable design systems and reusable component libraries, and ran design QA during developer handoff, cutting design-to-development rework by ~20%.
- Leveraged AI-assisted workflows across UX research, ideation, UX writing, documentation, and prototyping to compress design cycle time.

UI/UX Designer

Brandshark, Bangalore, India | Feb 2023 - Aug 2023

- Designed user-centered web and mobile experiences across healthcare, fashion, corporate, and e-commerce domains, from discovery to delivery.
- Delivered high-impact client projects including Youfiel (UAE), Tvasta, and Shades of Earth, improving engagement and conversion outcomes.
- Conducted product discovery, market research, competitive analysis, and requirement gathering in cross-functional collaboration with clients and developers to define user-centered solutions.
- Recognized as Employee of the Month for high-quality design delivery and mentoring fellow designers.

UI/UX Associate

InteractX, Remote | Oct 2021 - Jul 2022

- Designed UX and UI for business and e-commerce platforms, improving usability and responsive experiences across devices.
- Developed user flows, wireframes, and high-fidelity interfaces to structure end-to-end user journeys.
- Contributed to shared design systems, improving UI consistency across client projects.

KEY ACHIEVEMENTS

- Enabled ~80% recovery of blocked insurance claims through the AR platform for Spectrum Healthcare.
- Improved task efficiency by ~25-30% through workflow redesigns across enterprise products.
- Reduced design-to-development rework by ~20% via early alignment, design QA, and rapid prototyping.
- Designed mobile-first enterprise platforms supporting high-volume operational workflows.
- Built scalable design systems adopted across products, reducing developer effort and inconsistency.

SKILLS

UX & Product Design: Interaction Design, User Experience (UX) Design, User-Centered Design, Product Design, Visual Design, Wireframing, Prototyping, Rapid Prototyping, Information Architecture, Responsive Design, Mobile-First Design, Accessibility (WCAG), Motion Design, Micro-interactions, Product Discovery, End-to-End Product Design

Research & Strategy: User Research, Stakeholder Interviews, User Flows, Journey Mapping, Affinity Mapping, Personas, Usability Testing, Competitive Analysis, UX Audit, MVP Planning, Data-Informed Design Decisions

AI & Emerging Technology: AI Product Design, Generative AI, Large Language Models (LLMs), Conversational AI, Human-AI Interaction, Prompt Engineering, AI-Assisted UX Research, AI-Assisted Design Workflows, Research Synthesis, Design Evaluation

Systems & Collaboration: Figma, FigJam, Design Systems, Component Libraries, Design Documentation, Design QA, Developer Handoff, Cross-Functional Collaboration, Claude, Adobe XD, Photoshop, Illustrator, Miro, Jira, Confluence, Framer, Lottie, Agile/Scrum

Front-End Fundamentals: HTML, CSS, JavaScript

EDUCATION

B.Tech, Computer Science

Amal Jyothi College of Engineering, Kottayam, Kerala | 2013 - 2017

CERTIFICATIONS

- Google UX Design Professional Certificate, Google, 2022
- Enterprise Design Thinking, IBM, 2021
- Generative AI: Prompt Engineering & Introduction, IBM, 2026
